Social Networks in Teacher Education

Jan Folkert Deinum

Acknowledgement

- This project has been funded with support from the European Commission. This presentation reflects the views only of the presenter, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

The problem

- In teacher education many small subject related research topics with few researchers
 - Example 1: presentism in history education
 - Example 2: how to use home science experiments/ experience in science education
 - Many interested teachers, throughout Europe
- Difficult to gather research data from different countries
- Teachers have little access to research
- Teachers have little access about teaching their subject in other countries

The solution

- Researchers, teachers and student teachers throughout EU cooperate together in an online course
- Aims:
 - Professional development of (student) teachers
 - Exchange (cultural) knowledge
 - Collecting research data
- The online course will be open (free accessible)
 - The researcher opens access to knowledge about topic
- The cooperation will be closed in a „social network“
- In future hopefully: gathering data via open course

The problem

- In teacher education many small subject related research topics with few researchers
 - Example 1: presentism in history education
 - Example 2: how to use home science experiments/ experience in science education
 - Many interested teachers, throughout Europe
- Difficult to gather research data from different countries
- Teachers have little access to research
- Teachers have little access about teaching their subject in other countries

Proposed results

- ❑ 20 online courses/social networks in different fields (math, history, foreign languages, special education etc.)
- ❑ Guidelines for researchers how to support professional development of teachers and gather research data at the same time via online courses
- ❑ Analysis of learning results of involved (student teachers)
